Dear Nanikji,

I was eagerly awaiting your book. I received it yesterday and finished reading it this morning. It's an inspirational ^{book} and an unbelievable but true success story. The book is written in a very flowy, simple language narrating one adventure better than the earlier one. I don't read many books but I like to read about great men and women who struggled for success. There is lot to learn from their lives. The book is interesting till the last page. I am sure Nitu would have surely contributed in the last chapter.
